

Street Maps Plus Report

There's a large advantage to adding the Street Maps Plus Report to your account. If you find yourself running comparable reports often, this tip may help:

Click the Comparables Report radial button within the Report Options menu before you generate a StreetMap Plus Report.

- > By having this option selected, the comps that typically would be returned in a table on the Comparable Report will show on the Street Map. Additionally, the results will display in a tabular format at the bottom of the report.
- > Using Street Maps Plus, users have the ability to toggle between road, aerial and bird's eye view.

No Comps?
If you do not have the Comparables Report option selected, you will simply receive the subject property plotted on the map.
